**KSU SCHEDULING PERSPECTIVE**

In 2004, the perspective was to:
- Increase room utilization rates
- Spread the schedule in order to reduce room capacity (and parking!) issues during prime time
- Bring clarity to the scheduling process

Today, KSU is committed to:
- Scheduling to meet students’ needs
- Solving retention issues
- Increasing timeliness of degree completion
- Benefiting from government’s new funding formulae based on graduation rate

**ROOM UTILIZATION REACHES 85%**

The implementation of Infosilem EnCampus™ at Kent State University resulted in an automated process to build schedules. “The room utilization rate now stands at 85% and we still have a faculty-driven course distribution. By moving towards a student-oriented approach to building our course schedules we will further increase room utilization while serving our student population better.”

**SCHEDULERS TAKE LESS TIME TO SCHEDULE**

“We have increased operational efficiencies. Most schedulers now take less time to build schedules. It’s been a learning curve but now people feel good about it”, said Associate Provost, Stephane Booth.
MIGRATING TO A COURSE SCHEDULING ENVIRONMENT

As the University embraces a course scheduling environment Associate Provost Stephane Booth reflects that “It’s a good thing we were smart enough to clearly define our vision as it allowed us to purchase software that can evolve with our long-term goals. Infosilem has the most malleable product.”

Building the University’s course schedule to meet student academic requirements will help the University’s retention and graduation rate, maximize room utilization, and dramatically increase operational efficiencies.

ACADEMIC AFFAIRS NEXT STRATEGIC STEP

“The implementation of Infosilem (to support our course scheduling environment) is one of the most important strategic steps Academic Affairs will undertake over the next 36 months” wrote Robert G. Frank, Provost and Senior Vice President for Academic Affairs in his February 2010 Provost Update.

“The project will move us to a level of information management that will advance our program delivery significantly” and students will more easily be able to progress towards the degree they are seeking in a timely fashion. “Our goal is to have more students graduate in 4 years” said Sally Kandel, Associate Vice President.

AN EXCEPTIONAL PARTNER

Embracing an innovative approach to managing an institution scheduling operation can prove to be a daunting task. Choosing the right partner to help you realize that vision is as important as finding the right software solution.

“Infosilem has proven to be an exceptional partner to work with and that’s worth more than anything else.”

Stephane Booth
Associate Provost

ABOUT INFOSILEM

For the past 25 years, Infosilem has been developing solutions that have improved all scheduling functions and practices in the higher education sector. We offer the best customer support in the industry. In fact, our dedication and our comprehensive understanding of our client’s needs are rewarded with a 99% retention rate. You can trust Infosilem as your partner in scheduling success.
